Software Engineer

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning, with a strong interest in building practical and scalable technology solutions. Seeking placement opportunities in software engineering, AI, or data-driven domains where I can apply my technical skills, problem-solving abilities, and continuous learning mindset while contributing to organizational growth.

WORK EXPERIENCE

Visvesvaraya Research & Innovation Foundation (VTU)

SamShoDhana–2025 Fellow

- Gaining exposure to innovation, research methodology, and entrepreneurial thinking
- Participated in ideation-based learning and collaborative problem-solving activities

ATME COLLEGE OF ENGINEERING • Mysuru

NewsLetter Coordinator (Department of CSE-AIML) • Full-time

- Coordinated and managed newsletter content, including event updates, announcements, and team contributions.
- Ensured timely publication with proper formatting, editing, and professional presentation.

EDUCATION

Bachelor of Engineering – Computer Science & Engineering (AI & ML) in Computer Science & Engineering (AI & ML)

ATME College of Engineering, Mysuru • Mysuru

Affiliated to Visvesvaraya Technological University (VTU)

CERTIFICATIONS

Data Analytics with Python

NPTEL ONLINE CERTIFICATION

Artificial Intelligence

IBM SkillsBuild,LeoAxis

Technical skill development programs

Infosys Springboard

Professional and entrepreneurial skill training

HP LIFE

PROJECTS

CTI (Python Project)

- Developed a Python-based application focusing on CTI-related problem solving
- Implemented core logic and algorithms to handle and process data efficiently
- Enhanced structured programming skills and logical thinking
- Version controlled and hosted on GitHub

Plant Disease Detection System

- Developed a deep learning-based plant disease detection system using CNN models to classify plant leaf diseases from images.
- Built an end-to-end image processing pipeline including preprocessing, augmentation, model training, and evaluation.
- Improved model accuracy through image normalization and data augmentation techniques.
- **Tech Stack:** Python, TensorFlow/Keras, OpenCV, NumPy, Matplotlib

Email Spam and Phishing Detection System

- Built a machine learning-based system to detect spam and phishing emails using NLP and text classification techniques.
- Performed text preprocessing, tokenization, stopword removal, and TF-IDF feature extraction for model training.
- Trained and evaluated classification algorithms to improve email threat detection accuracy and security automation.
- **Tech Stack:** Python, Scikit-learn, Pandas, NumPy, NLTK

VOLUNTEERING & LEADERSHIP

IEEE onCampus ATMECE

Active Member

IET onCampus ATMECE

Active Member

SKILLS

Programming Language: C Programming, Python

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming

Artificial Intelligence: AI fundamentals, Machine Learning basics

Data Analytics: analysis, and interpretation, Data processing

Tools & Platforms: Git, GitHub, VS Code

Learning Platforms: HP LIFE, IBM SkillsBuild, Infosys Springboard

SOFT SKILLS: Communication Skills, Continuous Learning, Leadership & Initiative, Problem Solving, Teamwork & Collaboration
